MICROBIOLOGICAL REQUIREMENTS

The expression of microbiological quality criteria is based upon that recommended by "The International Commission on Microbiological Specification for Foods" where:

n = Number of samples

c = Maximum number of samples greater than or equal to m and less than M

m = Microbiological limit that:- in a 2 class plan separates good from defective quality;
- in a 3 class plan separates good from marginally acceptable quality.

M = Microbiological limit that:

- in a 3 class plan separates marginally acceptable from unacceptable quality;
- in a 2 class plan M may be assimilated to m.

The vendor determines how the verification (testing) is done to demonstrate compliance to the microbiological requirements.

Contaminant Microorganisms

Parameter	n	c	m	M	Comments
Aerobic mesophilic microorganisms	5	0	10,000 /g		ISO 4833
Enterobacteriaceae	5	0	10 /g		ISO 21528-2 Incubation temperature 37 °C
Salmonella	10	0	0 /25g		ISO 6579 Max. pooling 375 g per examination

PACKAGING, STORAGE & TRANSPORTATION

Use only Packaging Materials for food ingredients which are compliant to relevant food contact regulations/international standards.

Upon request, the vendor must provide a certificate of compliance to the food contact regulations for all food ingredient packaging materials.
