### **MICROBIOLOGICAL REQUIREMENTS**

The expression of microbiological quality criteria is based upon that recommended by "The International Commission on Microbiological Specification for Foods" where:

- n = Number of samples
- c = Maximum number of samples greater than or equal to m and less than M
- m = Microbiological limit that:- in a 2 class plan separates good from defective quality;
  - in a 3 class plan separates good from marginally acceptable quality.
- M = Microbiological limit that:
  - in a 3 class plan separates marginally acceptable from unacceptable quality;
  - in a 2 class plan M may be assimilated to m.

The vendor determines how the verification (testing) is done to demonstrate compliance to the microbiological requirements.

### **PACKAGING, STORAGE & TRANSPORTATION**

Use only Packaging Materials for food ingredients which are compliant to relevant food contact regulations/international standards.

Upon request, the vendor must provide a certificate of compliance to the food contact regulations for all food ingredient packaging materials.
