MICROBIOLOGICAL REQUIREMENTS

The expression of microbiological quality criteria is based upon that recommended by "The International Commission on Microbiological Specification for Foods" where:

- n = Number of samples
- c = Maximum number of samples greater than or equal to m and less than M
- m = Microbiological limit that:
 - in a 2 class plan separates good from defective quality;
 - in a 3 class plan separates good from marginally acceptable quality.
- M = Microbiological limit that:
 - in a 3 class plan separates marginally acceptable from unacceptable quality:
 - in a 2 class plan M may be assimilated to m.
